Middle & High School Summer Camps

Join Fab Lab Houston this summer for a variety of STEM programs designed for middle & high school students! Our hands-on activities will provide campers with the opportunity to be creative while learning digital fabrication techniques.

Beginner Sewing: July 29 - August 2, 2:00-5:00PM
Campers will learn how to cut fabric using traditional ways as well as with a laser cutter, basic sewing skills, and machine embroidery while making fun projects throughout the week.

Fab Lab Ambassadors: August 5-9, 2:00-5:00PM
Our Fab Lab Ambassadors program is a great way for campers to learn about the tools and machines available in the Fab Lab. It’s a sampler class for students interested in learning about 3D printing, laser cutters, vinyl cutters, wood working, and more.

Cost: $50 per student, $25 per student for members of the Community Center and/or Fab Lab Houston
